

# avetus

/a+'we.tus/ (adj)

VETERAN. EXPERIENCED. SEASONED.

## WHAT WE DO

We provide *Veterans Affairs* with:

- Executive Level Cerner EHR Consulting
- The processing and prioritization of over \$1.4B in Unfunded Requirements **powered by atrax**

**Avetus** is a **Service Disabled Veteran Owned Small Business (SDVOSB)** predominantly within **healthcare**.

We specialize in transforming data into actionable decision-making information while promoting transparency, collaboration and governance. We have the capabilities to increase awareness for how performance measure information is collected, managed, and communicated.

## HOW WE DO IT

We provide Navy Medicine's *Bureau of Medicine & Surgery* with:

- Medical Readiness spatial and geographic data (GIS) support

## OUR KNOWLEDGE IN ACTION

Avetus developed a comprehensive unfunded requirements solution for the Veterans Affairs (VA) using our **atrax** decision support system. We provided the governance structure that laid out the process for generating an Integrated Priority List (IPL) for vetting and approval of unfunded requirements (UFRs).

Using Avetus' Remote Patient Monitoring (RPM) solution developed for eMedical Sentry, a pilot study demonstrated that RPM within a Heart Failure Clinic setting can be successfully implemented in ambulatory HF patients and may reduce readmission rates.

## "Our employees and their Avetus journey"

Through People Operations, our intent to propel higher productivity centers on the ongoing experiences of our Avetus team members over their entire journey. We design work so our Teammates WANT to be here...present, engaged, and proud of what they do.

We coordinate all the functions that touch our employee's journey at Avetus to support and nurture them in a way that equips them to be as productive as possible.
